Why Artemis, Why Now, and Why Your Gift Creates a Self-Sustaining Institution

WHY NOW

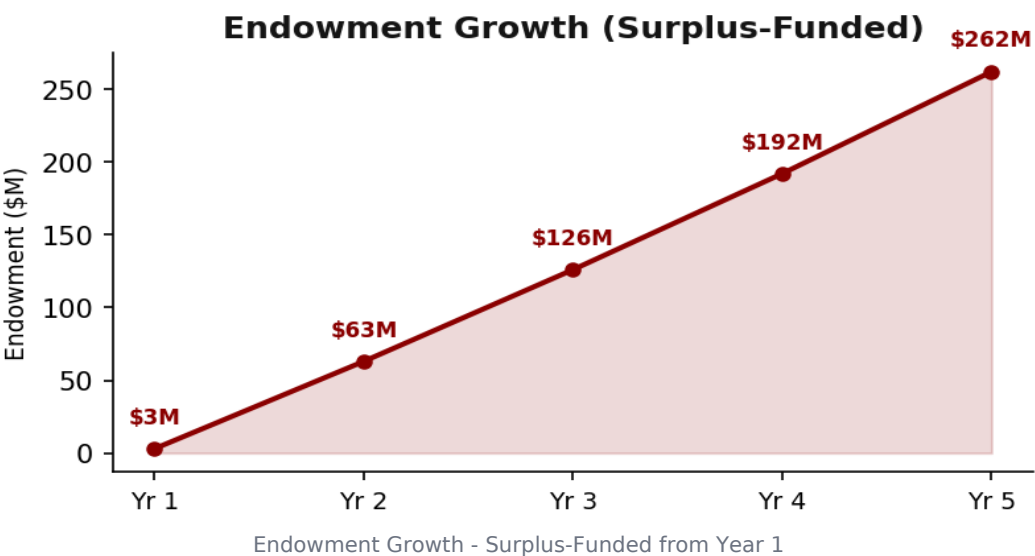

The tools that make a global, residential, digitally-connected institution possible did not exist five years ago. They do now. By 2030, the global middle class will expand by 1.4 billion people, and with it the demand for quality higher education. Yet university capacity has barely kept pace. In Africa, enrollment rates remain below 10%. The opportunity cost of inaction is incalculable.

WHY ARTEMIS

Artemis is not another online university. It is a completely new model: residential, global, mission-driven, financially self-sustaining from Year 1. The Collegium model is proven - Oxford and Cambridge have operated this way for 800 years. Artemis adds scale (50 colleges), global reach (6 continents), and financial sustainability (tuition-funded surplus).

WHY YOUR GIFT MATTERS

Your gift is seed capital that launches a permanent institution. After Year 1, the \$262M annual surplus funds scholarships, builds the endowment, and seeds new Colleges. Every campaign dollar unlocks \$15 in 5-year surplus.

THE SELF-SUSTAINING ENGINE

100,000 students at \$3,000/year generates \$300M. OPEX at 12.4% leaves \$262M surplus. The surplus self-funds \$40M/year scholarships, builds endowment at \$60M/year, seeds every new College.

100,000	\$300M	12.4%	\$262M
Students	Revenue	OPEX	Surplus

A PERMANENT INSTITUTION

Three legal entities across three jurisdictions. Delaware 501(c)(3), UK CIO with Gift Aid, Swiss Fondation for endowment. No single controller. Annual Big Four audit. Complete transparency is structural.

THE INVITATION

This is the founding moment. Every great institution had a founding cohort who said yes before the buildings were built. They are the ones whose names are remembered.
