
STRATEGIC PLAN 2025-2030

The Five-Year Roadmap for the University of Artemis

FROM FOUNDING TO PERMANENCE.

CONTENTS

1. Strategic Vision & Mission
2. Year 1 (2025): Launch
3. Year 2 (2026): Consolidation
4. Year 3 (2027): Expansion
5. Year 4 (2028): Maturation
6. Year 5 (2029): Permanence
7. Academic Strategy
8. Financial Strategy
9. Infrastructure Strategy
10. Research Strategy
11. Student Experience Strategy
12. Governance & Risk
13. Key Performance Indicators

1. STRATEGIC VISION & MISSION

The University of Artemis exists to make world-class higher education accessible to every qualified student on Earth, regardless of their financial means, geographic location, or social background. The strategic vision for 2025-2030 is to establish the university as a self-sustaining, globally distributed, research-active institution that sets the standard for accessible, high-quality higher education. By the end of Year 5, the university will serve 300,000 students across 70 Colleges in 40+ countries, generate \$1.88B in annual revenue, maintain a \$1.35B endowment, and produce research that shapes global policy and practice across every domain of inquiry.

YEAR 1 (2025): LAUNCH

The first year is about execution: converting the \$100M founding campaign into a fully operational university serving 100,000 students across 50 Colleges in 35 countries. The priority is getting the fundamentals right — tutorials running, faculty in place, students enrolled, and the financial engine operating. Year 1 targets include: 100,000 enrolled students, 2,000 faculty onboarded, 50 Colleges operational, \$300M tuition revenue, \$38M surplus, and all 19 Centers of Inquiry active with at least one project each. The risk is operational: can we open 50 Colleges simultaneously? The mitigation is standardisation — every College follows the same operational playbook, uses the same IT systems, and adheres to the same academic standards.

Key Milestones:

- Enroll 100,000 students across 50 Colleges
- Onboard 2,000 faculty
- Launch all 19 Centers of Inquiry
- Achieve \$300M tuition revenue
- Generate \$38M surplus
- Establish governance bodies (Board, Senate, Visitors)

YEAR 2 (2026): CONSOLIDATION

The second year is about quality: refining the tutorial system, improving student outcomes, and building the institutional culture that will define Artemis for centuries. Year 2 targets include: 150,000 students, 55 Colleges (5 new additions), \$630M revenue, \$150M surplus, and the first cohort of graduating students. The academic focus is on competency assessment: ensuring that the competency-based model produces measurable learning outcomes that exceed those of traditional universities. The operational focus is on efficiency: reducing the cost per student while maintaining or improving quality.

Key Milestones:

- Grow to 150,000 students and 55 Colleges
- Graduate the first cohort
- Achieve \$630M revenue
- Generate \$150M surplus
- Launch 5 new Colleges in underserved regions
- Publish first annual impact report

YEAR 3 (2027): EXPANSION

The third year is about scale: expanding the college network, deepening the research portfolio, and establishing Artemis as a major global institution. Year 3 targets include: 200,000 students, 60 Colleges, \$1.02B revenue, \$350M surplus, and 42 active research projects across 19 Centers. The strategic focus shifts from execution to leadership: Artemis begins to set the agenda in global education policy, not just respond to it. The first Artemis Research Conference brings together scholars from all 19 Centers and establishes the university as a centre of intellectual gravity.

Key Milestones:

- Reach 200,000 students and 60 Colleges
- Host the first Artemis Research Conference

- Achieve \$1.02B revenue
- Generate \$350M surplus
- Endowment reaches \$475M
- Launch joint programmes with partner universities

YEAR 4 (2028): MATURATION

The fourth year is about depth: strengthening academic reputation, expanding research output, and building the alumni network that will sustain the university for decades. Year 4 targets include: 250,000 students, 65 Colleges, \$1.4B revenue, \$500M+ surplus, and the endowment crossing \$850M. The alumni network, now with 3 graduating cohorts, begins to generate the professional connections and institutional loyalty that define great universities. The first Artemis alumni reunion is held simultaneously across all Central Nodes.

Key Milestones:

- Reach 250,000 students and 65 Colleges
- Endowment exceeds \$850M
- Achieve \$1.4B revenue
- Launch the Artemis Alumni Network
- Establish research partnerships with 10+ leading universities
- Begin endowment-funded scholarship programme

YEAR 5 (2029): PERMANENCE

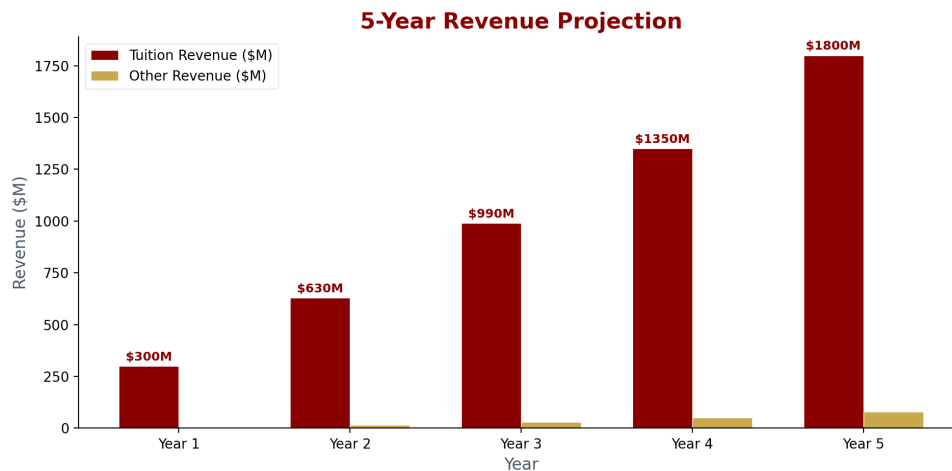

The fifth year marks the transition from a startup to a permanent institution. Year 5 targets include: 300,000 students, 70 Colleges, \$1.88B revenue, \$740M surplus, and a \$1.35B endowment. The university is now one of the largest and best-endowed institutions in the world, serving more students than any single-campus university

and generating enough surplus to fund its own expansion indefinitely. The strategic plan for 2030-2035 focuses on deepening quality, expanding access, and ensuring that the university's governance and financial structures are robust enough to survive and thrive for centuries.

Key Milestones:

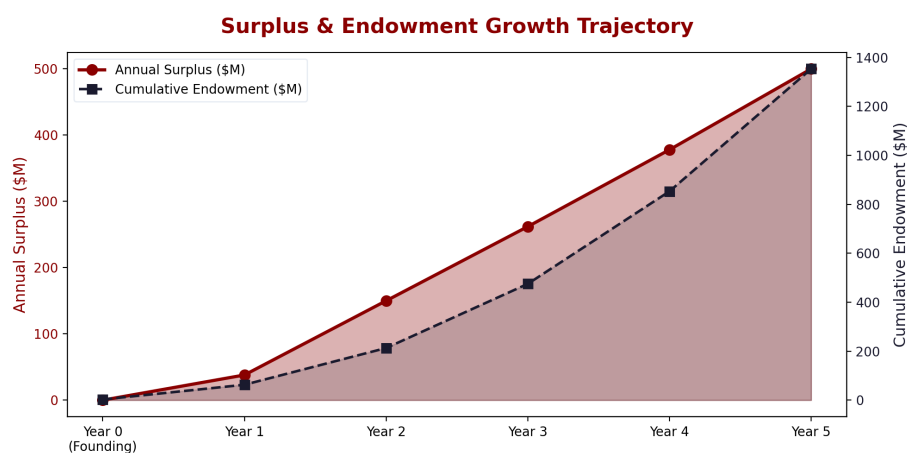

- Reach 300,000 students and 70 Colleges
- Endowment reaches \$1.35B
- Achieve \$1.88B revenue
- Self-fund all scholarships from surplus
- Publish the 5-Year Impact Report
- Approve the 2030-2035 Strategic Plan

8. FINANCIAL STRATEGY

5-year revenue growth from \$305M to \$1.88B.

The financial strategy is simple: grow revenue faster than costs, reinvest surplus into scholarships and endowment, and let the financial engine compound. Tuition revenue grows from \$300M in Year 1 to \$1.8B in Year 5, driven by enrollment growth (100K to 300K) and the addition of 20 new Colleges. Operating costs grow more slowly due to economies of scale and operational efficiency gains. The surplus grows from \$38M to \$740M, with 50% allocated to endowment growth, 30% to scholarship expansion, and 20% to network expansion. The endowment, seeded at \$3M from the founding campaign and grown by annual surplus contributions, reaches \$1.35B by Year 5 — making Artemis one of the best-endowed universities in the world within a single strategic planning period.

13. KEY PERFORMANCE INDICATORS

KPI	Year 1	Year 3	Year 5
Students Enrolled	100,000	200,000	300,000
Active Colleges	50	60	70
Faculty	2,000	4,000	6,000
Revenue	\$305M	\$1.02B	\$1.88B
Annual Surplus	\$38M	\$350M	\$740M
Endowment	\$63M	\$475M	\$1.35B
Scholarships Funded	10,000	16,600	23,200
Research Projects	42	80	120
Countries	35	38	42
Faculty:Student Ratio	1:7	1:7	1:7
